

Praveen Kumar Mahawar

Senior Full-Stack Product Engineer | SaaS MVPs, Web Apps & Mobile PWAs

Jabalpur, MP, India (Worldwide Remote) praveen@garudaos.in garudaos.in

Full UK (GMT/BST) & US (EST/PST) Overlap

EXECUTIVE PROFILE SUMMARY

Hands-on **Senior Full-Stack Product Engineer with 10+ years of proven experience** building and shipping high-performance web applications, interactive SaaS dashboards, and offline-first mobile Progressive Web Apps (PWAs). Specializes in rapid **0-to-1 MVP execution for US, UK, and Australian founders and agencies** — taking ideas from wireframe to production deployment in 14 days without agency bureaucracy. Combines clean, responsive frontend craftsmanship (React 19, Vite, Tailwind CSS) with robust backend microservices (Node.js, Express, PostgreSQL, Supabase) and seamless Stripe/PayPal monetization rails.

WHAT I DELIVER FOR FOUNDERS & BUSINESSES

**14-Day SaaS MVP Launch**
Full 0-to-1 build: User authentication, multi-tenant database, sleek analytics dashboard, and Stripe recurring subscription billing.

**Offline-First Mobile PWAs**
Apps that install directly on iOS & Android in 1 tap without 30% App Store fees, featuring local caching, dynamic QR codes, and push notifications.

**High-Speed Web Applications**
Pixel-perfect, mobile-first responsive web apps built with React 19 & Vite. Sub-second page loads, zero UI layout shift, and 98+ Lighthouse scores.

**Custom Backend & API Integrations**
Secure Node.js/Express REST APIs, Supabase/Postgres architectures, automated webhooks, CRM connections, and third-party API wiring.

TECHNICAL ARSENAL

Frontend Architecture: React 19, Vite, Next.js concepts, Tailwind CSS, Modern Canvas/SVG Rendering, PWA Web Manifests, Responsive Viewport Lockdown.

Backend & Microservices: Node.js (ESNext/CJS), Express, Python, RESTful APIs, WebSockets, Serverless Functions (Vercel, Render), Secure Session Governance.

Databases & Auth: PostgreSQL, Supabase, MySQL, Redis, SQLite, JSON Data Engines, JWT, OAuth2 (Google, Meta, GitHub sign-ins), Role-Based Access Control (RBAC).

Payments & APIs: Stripe (Checkout, Elements, Webhooks, Subscriptions), PayPal, Meta Graph API, Google Workspace APIs, SendGrid, Twilio.

Automation & Scraping: Puppeteer, Playwright, Chrome DevTools Protocol, Headless Web Automation, Data Extraction & Transformation Pipelines.

DevOps & Deployment: Git, GitHub, Vercel, Cloudflare Pages & Workers, Render Cloud, CI/CD automated linting, Linux & Windows Terminal Environments.

PROFESSIONAL EXPERIENCE

Lead Product Engineer & Systems Architect | GARUDA OS2023 - PRESENT | REMOTE

- Constituency War Room & Cadre Mobile PWA:** Architected an interactive, multi-tab operational web application and companion offline-first field PWA. Features sub-100ms dashboard filtering, dynamic SVG QR code generation, and instant mobile home-screen installation without app store friction.
- 0-to-1 Platform Engineering:** Built the complete full-stack web architecture for *garudaos.in* using React 19, Vite, and serverless Node.js, achieving 960+ pre-rendered static routes and sub-second asset delivery globally.
- Fintech Qualification & Checkout Rails:** Engineered a 19-section commercial checkout flow with deterministic state machine verification, zero-custody credential stripping, and automated Stripe/webhook reconciliation.
- Automated Data Pipelines:** Built resilient background services processing over 100k+ data points into structured PostgreSQL/JSON schemas with automated failure recovery.

Senior Full-Stack Web & MVP Consultant | [Independent Contractor](#)2018 – 2023 | REMOTE (UK / US / GLOBAL)

- **Startup MVP Delivery:** Partnered with early-stage founders across the US, UK, and Australia to design, code, and deploy 20+ responsive web applications and SaaS MVPs from scratch, delivering production launches in an average of 14 to 21 days.
- **Custom Dashboards & Portals:** Built customer portals, admin panels, and e-commerce web applications featuring real-time data tables, interactive charting, and granular role-based permissions.
- **Payment & CRM Integrations:** Integrated Stripe subscription billing, recurring invoicing, and CRM automations (HubSpot, Google Sheets, email dispatchers) to automate client onboarding and payment reconciliation.
- **Performance Re-engineering:** Migrated legacy, sluggish websites into lightweight React/Node architectures, reducing page load times by up to 60% and directly increasing mobile conversion rates.

Full-Stack Web Developer | [Enterprise Web & Database Solutions](#)2014 – 2018 | INDIA

- Developed responsive web portals, custom CMS platforms, and relational database schemas (MySQL/PostgreSQL) for commercial businesses.
- Engineered clean frontend interfaces with HTML5, CSS3, JavaScript, and modern UI libraries, delivering seamless cross-browser compatibility.

SELECTED PRODUCT SHOWCASES

GARUDA OS Platform (garudaos.in)

High-speed, luxury dark-mode web application featuring real-time interactive dashboards, pre-rendered SEO pipelines, and zero-flicker viewport architecture.

Cadre Field Mobile PWA

Offline-first mobile web app with instant 1-tap installation, dynamic QR code matrix generator, and local caching for low-connectivity environments.

Fintech State Machine & Billing Portal

Self-contained qualification and proposal generator with deterministic multi-tier pricing, cryptographic audit logs, and automated payment gateways.

Headless Web Scraping & Lead Hub

High-throughput data extraction and structuring engine harvesting 100k+ records and populating clean relational databases with zero data loss.

EDUCATION & CREDENTIALS

Bachelor of Computer Applications (BCA)

Core Foundations: Web Engineering, Database Management Systems (DBMS), Object-Oriented Software Design, Data Structures & Algorithms, Network Architectures.
